Experience

Zappy – Full Stack Engineer Intern

Nov 2025 – April 2026

Remote (Gurgaon, India)

- Built and enhanced full-stack features for an event-tech marketplace using **React, Node.js, Express.js, and MongoDB**.
- Developed and integrated **RESTful APIs** to support seamless communication between frontend and backend systems.
- Optimized MongoDB queries and backend workflows to improve application performance and response efficiency.
- Contributed to a modular backend architecture, improving code maintainability, scalability, and reusability.

Proxenix – Web Development Intern

April 2025 – May 2025

Remote (India)

- Developed responsive and user-friendly frontend components using modern web development practices.
- Implemented interactive features with JavaScript and integrated APIs to improve functionality and user experience.
- Optimized UI performance to deliver smoother and more efficient web interactions across devices.
- Collaborated with developers in a professional workflow, following clean coding practices and review standards.

Technical Skills

Languages: C++, JavaScript, TypeScript, HTML, CSS

Frameworks & Libraries: React.js, Next.js, Redux, Tailwind CSS, Node.js, Express.js

Databases: MongoDB, SQL, Redis

Tools & Technologies: Git, GitHub, Postman, REST APIs, WebSockets

Cloud & Deployment: Vercel, Netlify, Render

Projects

DevLinker — React.js, Node.js, Express.js, MongoDB (Live Demo)

July 2025 – Sep 2025

- Built a **full-stack social platform** using React.js, Node.js, Express.js, and MongoDB where developers can connect via profiles, share projects, join discussions, and explore freelance gigs.
- Developed a modular **React.js frontend** with reusable components and dynamic routing for a responsive user experience.
- Implemented **JWT-based authentication** and RESTful APIs with Express.js for secure user access, profile management, and gig applications.
- Integrated **Socket.io for real-time messaging** and designed MongoDB schemas to support user profiles, projects, discussions, and gig features.

StudyNotion — React.js, Node.js, MongoDB (Live Demo)

Jan 2025 – Feb 2025

- Developed a full-featured **EdTech platform** with role-based dashboards for students, instructors, and admins; implemented profile management, password recovery, and secure **JWT-based authentication**.
- Implemented course creation workflows with media uploads to **Cloudinary**, automated enrollment via **Razorpay** payment integration, and optimized state management using **Redux Toolkit**.
- Engineered **OTP-based** email verification using **Nodemailer**, integrated course progress tracking, and built a rating/review system with interactive analytics dashboards.

Employee HR Platform — MERN Stack, Tailwind CSS, JWT (Live Demo)

Nov 2024 – Dec 2024

- Built a comprehensive **full-stack HR management platform** using MERN stack featuring **JWT-based authentication**, role-based access control, and protected API routes for secure operations.
- Implemented multi-module system including **employee management, leave tracking, attendance monitoring, payroll processing**, and company-wide announcements with **Admin, HR, Manager, and Employee** roles.
- Optimized database queries by **40%** using structured Mongoose schemas and achieved **25%** improvement in dashboard performance through efficient API caching and pagination strategies.

Achievements

- Selected as **Frontend Developer at DSDL Club** through a competitive screening process (Top 10 out of 120+ applicants), demonstrating strong problem-solving and frontend development skills.
- Led the frontend development of the official club website, improving UI responsiveness and optimizing performance for better user experience.
- Mentored 30+ students in web development fundamentals, Git-based collaboration, and real-world project structuring, enhancing their practical development skills.

Education

KIET Group of Institutions, Ghaziabad

2022 – 2026

B.Tech in Computer Science & Information Technology (CGPA: 7.5/10)
